Plastic

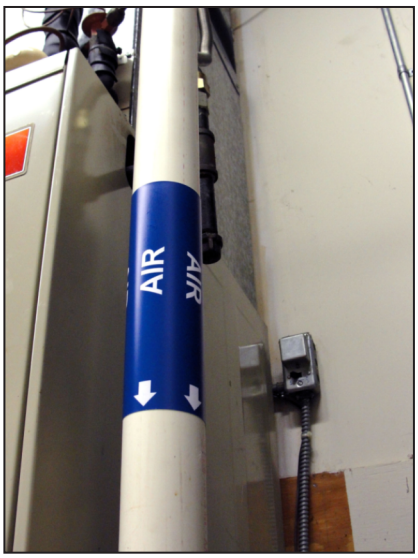

Flexible Plastic Pipe Wrap

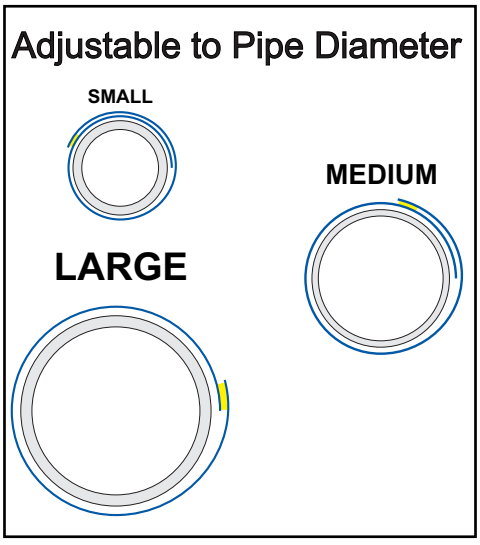

Product Data Bulletin

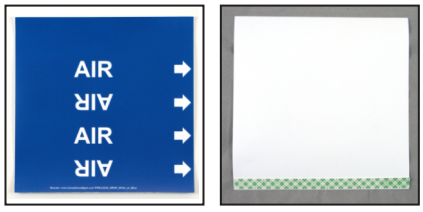

Description:

Semi-rigid PVC is printed with UV resistant, ecosolvent ink. A permanent adhesive tape strip allows the plastic to be securely fastened after wrapping around a pipe. The tape sticks to the plastic wrap rather than the pipe, allowing the wraps to adjust to different pipe diameters, and to be wrapped around pipes with dirty or wet surfaces. Recommended for indoor and outdoor business and industrial environments. Service temperatures up to +150 F.

FRONT REAR

Specifications:

SUBSTRATE:	9 mil Semi-rigid PVC
PRINTING LAYER:	UV Stable Eco-solvent ink - direct to substrate printing
MOUNTING:	Adhesive Mounting Strips
